

Irus Mix

AUTOMATE COLOUR LIKE NEVER BEFORE

FULLY AUTOMATED MIXING MACHINE

SCAN MATCH MIX

Axalta Irus is the most advanced, fully automated and integrated digitised colour management process in the world.

It's amazing that something so advanced can make things so simple. Just scan, match and mix. All completely digitally.

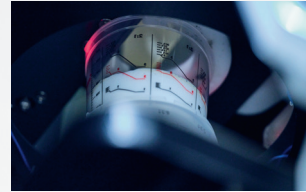

The Axalta Irus colour management process is your key to precisely matching colour quickly and cost-efficiently to maximise profitability and minimise environmental impact. Totally digital from scanning to mixing, it's easy to use and frees up staff to work wherever suits them best. Because it's fast, accurate and flexible, Axalta Irus means higher productivity for the new generation of super-efficient digital bodyshops.

Consumption Advantages

Colour accuracy you can count on

Cleverly designed bottles and automation processes deliver precise dosing and accurate colour all the time, every time.

Time Advantages

High speed mixing for higher bodyshop productivity

Maximises throughput and improves productivity in your bodyshop.

Labour Optimisation

Remove bodyshop bottlenecks

It's so simple to operate, anyone can use it which frees up your painters and boosts bodyshop capacity.

Environmentally Thoughtful

Kinder to the environment

Proven ergonomic bottles in a variety of sizes are made from 50% recycled plastic and reduce waste by delivering every last drop of paint.

Additional Benefits

Max efficiency, profit and ROI

Axalta Irus Mix saves time, increases throughput - and all without the need for a big capital outlay.

Automate colour like never before - with Axalta Irus Mix.

Axalta Irus Mix is a key part of the Axalta Irus digital colour management process. It is the fastest fully automated mixing machine ever and totally hands-free to use. Available exclusively from Axalta, it puts you at the forefront of refinishing.

Hands-free convenience

Hands-free to use, Axalta Irus Mix also uses regular Axalta bottles so you don't even need to re-can.
