## The Timeless Collection

### SuperDurable powder coatings

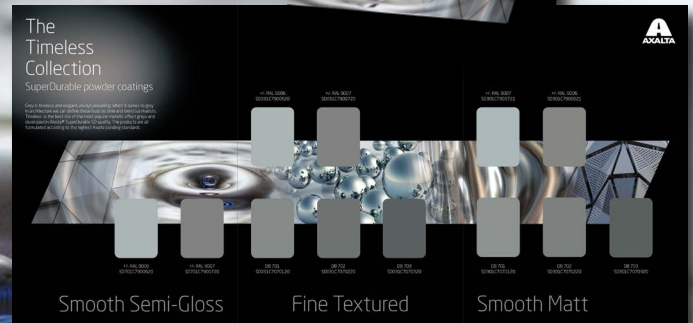

**Grey is timeless and elegant, always prevalent. When it comes to grey in architecture we can define these hues as time and trend survivalists. The Timeless Collection is the best mix of the most popular metallic effect greys and developed in Alesta® SuperDurable SD quality. The products are all formulated according to the highest Axalta bonding standards.**

In this new edition of The Timeless Collection we have included the pearlescent nuances of the DB colours 701, 702 and 703 combined with RAL 9006 and RAL 9007 in a matt, semi-gloss and our original fine textured finish. Our Alesta® SD SuperDurable quality products offer high quality protection and enhance the design of metal substrates. The bonded metallic effect accentuates the depth of the colour and ensures batch-to-batch consistency.

Throughout the formulation and manufacturing process special attention has been paid to developing a simple and robust application. This leads to problem-free and consistent coating results ensuring that our customers can maintain their own high standards. In addition to this, chemical resistance was further improved in order to surpass current demands and possible future requirements.

The colours of The Timeless Collection are quality-tested for use on façades and different architectural applications. Alesta® SD SuperDurable meets the requirements of Qualicoat Class 2, GSB Florida 3 (Master) and AAMA2604 requirements.

This collection of timeless colours connects brilliant bonded metallic effects, the simplicity of application and sustainability.

#### Highlights

- Durable & sustainable
- Excellent applicability
- Bonded, homogeneous metallic effects
- Excellent batch-to-batch consistency
- Matt, Semi-Gloss or Fine Textured finish
- SuperDurable Qualicoat Class 2 & GSB Florida 3 (Master) certified
- Meeting the AAMA2604 requirements
- All Timeless products are available from stock.

Colour matches of powder coatings to a liquid coating sample may show differences.
