

Alesta® AP QualiSteel

Powerful Steel Protection

Alesta® AP QualiSteel , innovative architectural quality for the protection of steel.

By using Alesta® AP QualiSteel you will get the professional solution in terms of application, efficiency, protection, and durability while preserving the appearance of the surface from as low as 160°C in order to save energy or at higher temperature to gain productivity. This product also offers superior mileage and provides you an additional gain on efficiency.

When it comes to sustainability, Alesta® AP QualiSteel is an excellent choice. It enables you not only to save energy or material, it is also label free, and offers any steel structure a much longer life span thanks to the coating excellent UV stability.

With Alesta® AP QualiSteel, Axalta offers a range of highly efficient powder coatings with excellent degassing properties for porous steel substrates. These product intrinsic properties allow to coat the steel structure while it is still degassing.

Highlights

- Excellent degassing properties
- Higher energy savings
- Superior productivity
- Excellent UV stability
- Part of QUALISTEELCOAT coating system
- Excellent mechanical properties
- Good flow & moderate waxy appearance
- Reduced powder consumption
- Main RAL based colours available from stock

Main applications

- Steel construction
- Machinery
- Urban & outdoor furniture
- Greenhouse construction
- Fencing
- Urban & outdoor lighting
- Playground & outdoor fitness equipment
- and many more
