

Metallics Are Us

Metallic effect powder coatings

Metallics Are Us

The Metallics Are Us powder coatings are all developed and manufactured using our latest bonding technology and makes our products easy-2-use and apply. In addition, they all meet either Qualicoat Class I or II and GSB Florida 1 (standard) and 3 (Master). The areas of application for this range of products are primarily in the architectural market; aluminium profiles, sheet metal, cladding, windows & doors, outdoor or indoor furniture & lighting and more.

The diversity of colour and effects comprise the timeless, well appreciated grey hues like RAL 9006 & 9007, a wide range of DB colours and also connect to prevailing trends like gold, bronze, copper and weathered oxidised or vintage looks. In addition, we also offer a wide range of finishes replicating the anodic look with all the advantages of a powder coating.

Discover our premium colour collections like ICONICA, the SuprAnodic, Timeless and Anodic Collection.

All products are available from stock and delivered within a short timeframe. Axalta metallic effect powder coatings stand out with their great brightness, optical depth and fascinating colour effects under changing light conditions.

metallics-are-us.alestacolourit.com

Axalta was one of the first manufacturers to produce in-house bonded metallic powder coatings. Consequently we can look back on over 20 years of experience! This experience has been put to work in our extensive bonded metallic offering, showcased in a variety of colour collections.

Advantages of bonded metallics

Bonded metallics have several advantages compared to dry blend products. Because of the bonded formulation & production process we're able to design colours with more metallic particles, creating a sparkling effect with more depth. The batch-to-batch colour consistency of our bonded metallics is excellent. Furthermore, they are easy-to-use due to their high stability and applicators can reclaim excess powder during application, making the product also more cost effective. All this results into a smooth production process with a homogeneous finish.

Our metallic effect powder coatings are available in Alesta® AP Architectural Polyester and Alesta® SD SuperDurable and are available from stock.
