

Alesta[®] Anti-Skyd

Slip Resistant Powder Coatings

Keep Slippery Surfaces Safe While Providing Durability and Weatherability.

Slippery surfaces can pose dangers especially when exposed to water. Alesta® Anti-Skyd slip resistant powder coatings provide the best solution for extremely slick areas that pose hazards to a person's safety, while also holding up to heavy traffic, harsh chemicals and corrosion.

Alesta Anti-Skyd coatings are designed with extended exterior durability in mind, so that color and gloss retain its original appearance for a longer period of time. Alesta Anti-Skyd coatings are easy to apply, and can be applied directly to metal to provide a durable and beautiful finish that wears much better than traditional non-skid tape.

Typical Uses:

- » Decking
- » Railing
- » Ramps
- » Steps
- » Flooring
- » Hand Tools

In testing, Alesta Anti-Skyd coatings withstood over 3,000 cycles of abrasion testing (per ASTM D-4060)

Super Durable Polyester
provides a weatherable, and protected surface

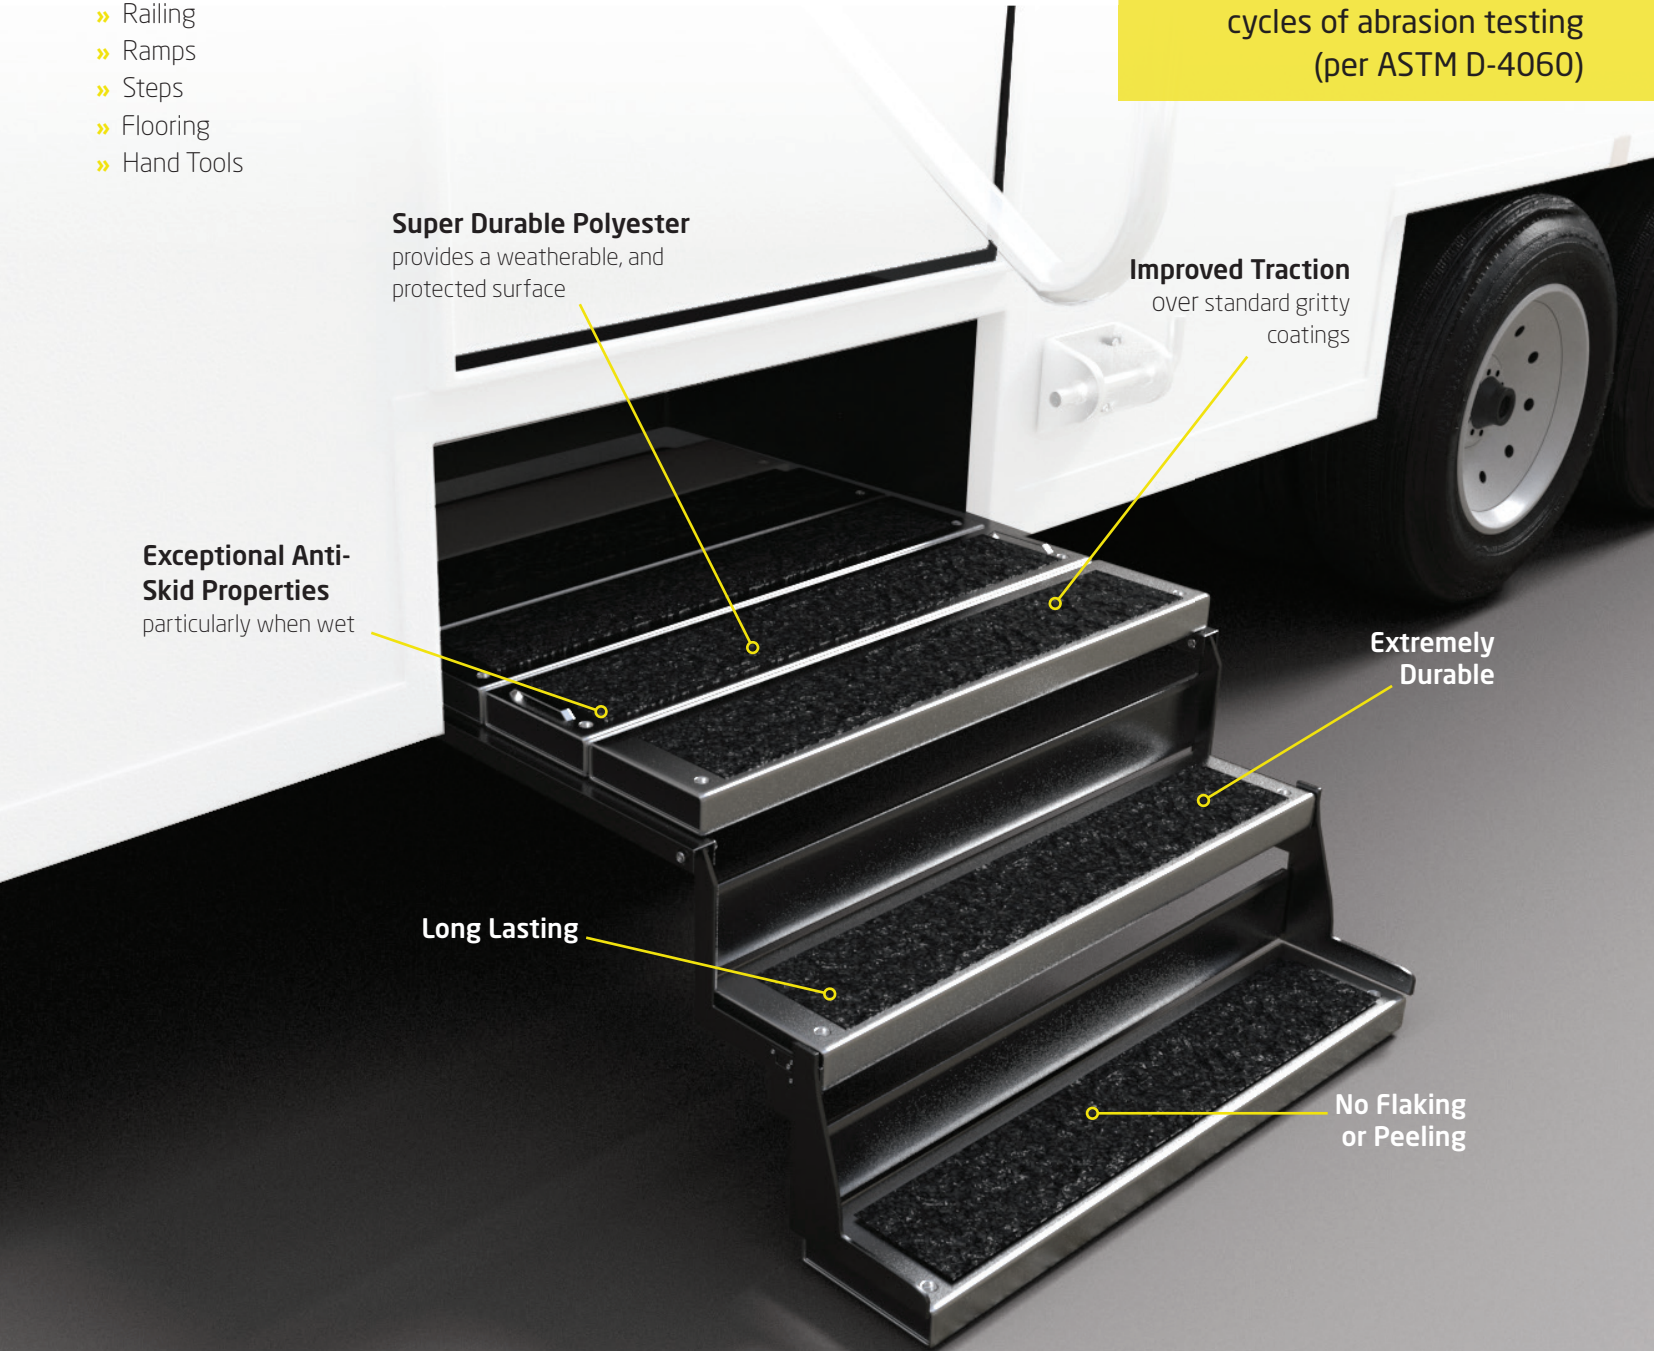

Improved Traction
over standard gritty coatings

Exceptional Anti-Skid Properties
particularly when wet

Extremely Durable

Long Lasting

No Flaking or Peeling

Alesta Anti-Skyd products are formulated as Super Durable TGIC-polyesters, and can also be made as custom products in Epoxy, Hybrid, and HAA chemistries. This product is available in 25 pound boxes.

AAS Buff
PFT696T0025

AAS Jet
PFB748T0025

AAS Citron
PFY723T0025

AAS Frost
PFW771T0025

Application:

Electrostatic Spray, Cold

kV Setting	70
Air Pressure	10
Distance Gun-Part	6-8 inches
Film Thickness	4.0-5.0 Mils
Cure Temperature	400°F
Cure Time	10 minutes

Alesta Anti-Skyd coatings provide a high coefficient of friction, providing significantly improved slip over a standard powder coating.

Alesta Anti-Skyd products are made to order.
