

IMRON®

Vehicle Wash Process

Step 1 | Move Vehicle

- Park vehicle inside or where there is no direct sunlight

Step 2 | Pressure Rinse

- Rinse off loose dirt and filth using a hot water pressure washer
- Work from top to bottom of vehicle

Step 3 | Fill bucket

- Add hot or warm water
- Add car wash soap with no wax or sealer additives

Step 4 | Wet Vehicle

- Spray vehicle with hose to wet vehicle completely

Step 5 | Wash Vehicle

- Choose a clean, debris-free mitt or soft brush
- Wet mitt or brush in bucket
- Begin washing from top down - Do not allow to dry
- Wash interior or backside of all panels to be refinished

Step 6 | Rinse vehicle

- Use hose to rinse vehicle as needed prior to soap drying
- Rinse from top to bottom

Step 7 | Dry Vehicle

- Once rinsed completely, use chamois or blade to completely dry vehicle before water evaporates
- Blow off vehicle body panel joints, seams, and wheel arches with compressed air and lint-free towel

Step 8 | 5S (Sort, Straighten, Shine, Standardize, and Sustain)

- Clean and return all items back to their proper place
